

Evaluation of Lecturers by Students

The Evaluation of Lecturers by Students (EDOM) is an essential part of the quality assurance system at the Faculty of Philosophy, Universitas Gadjah Mada, aimed at maintaining the quality of academic programs. As a comprehensive effort, this evaluation plays a strategic role in ensuring that educational services meet the highest standards and support the sustainable development of academic quality. Through EDOM, students are given a platform to provide feedback on the quality of teaching they receive, allowing educational standards to be continually assessed and improved. This process reflects the Faculty's commitment to transparency and accountability and reinforces the role of students in upholding a high standard of educational quality.
